

MVE-FD “Flanged Drive”

**DESIGNED FOR
HORIZONTAL AND INCLINED
VIBRATING SCREENS**

EASY MAINTENANCE

Straightforward, intuitive design: by eliminating the requirements for hydraulic power and external drive units, removing the drive is quick and easy requiring only a few basic tools to unscrew the fastening bolts. Grease for life; easy change of the vibration intensity

QUICK INSTALLATION

“Plug & play” installation process compared to traditional drive systems: all the necessary drive components are already included inside the drive itself

BUILT TO LAST

The robust design and the first class materials ensure a long life

**VIBRATORS FOR
QUARRY & MINING,
RECYCLING**

MVE-FD 6 poles - 50Hz / 60Hz

APPLICATIONS

The FD series have been designed to be used on horizontal, inclined, mobile or fixed vibrating screens. In fact, thanks to their design and performance they can be used on many applications.

LIST OF APPLICATIONS

- Circular / elliptical motion screen
- Circular motion inclined feeders
- Dewatering screen
- Scalping screen
- Vibrating machines and plants for aggregates, soil and minerals processing

Horizontal screen with two FD

ADVANTAGES

DRASTIC REDUCTION OF MAINTENANCE

Maintenance Free. The FD series is greased for life, so lubrication is no longer needed during maintenance.

PLUG & PLAY: EASY AND FAST

The installation of the motors on the application is very simple and fast : in case of extraordinary maintenance, downtime are reduced.

MODULARITY

The use of FD requires few structural elements : both the design phase and the realization of the plant are made simpler.

AN INFILTRATION-PROOF SYSTEM

The FD motors are IP66 : it means that in case you need to replace it, the operations can be performed directly on site without worrying about water infiltration and dust.

BUILT TO LAST

The FD series has been designed and built with the aim of reaching a life time of more than 20,000 hours, in any condition.

VERSATILE

The FD Series can be used with inverters making it a versatile tool and able to meet all the screening requirements.

MVE-FD

PROBLEM SOLVING Avoids the use of through shafts with oil lubrication system.

FEATURES

INPUT VOLTAGE	400V (50Hz) or 460V (60Hz)
AMBIENT TEMPERATURE	-20 °C / + 40 °C
ENCLOSURE PROTECTION	IP 66
THERMAL PROTECTION	PTC Termistor 130 °C
INSULATION CLASS	F
